August 2013 - May 2018

Received a Bachelor of Science in Computer Science with a minor in Interdisciplinary Film and Digital Media (IFDM).

Overall GPA: 3.80

Department GPA: 3.842

PROJECTS

During my time at Ideum, I programmed **over 50 custom touch table applications** for museums, brands, companies, and even zoos all over the world. Examples of these include:

- Facebook (before they were Meta)
- Smithsonian (National Museum of African Art & National Air and Space Museum)
- World War II Museum
- San Diego Zoo
- California Science Center
- Da Vinci Science Center
- Space Needle
- Verizon
- Colonial Williamsburg
- Collins Aerospace
- X-Prize / Qualcomm

I have worked on both the frontend UI of projects, as well as the backend content management systems that allow users to update content from their computers.

I have worked on projects that involve microcontrollers (arduinos, Kinects, LEDs, microphones with LEDs) and networking (TCP, UDP, Netcode for Unity).

I have made apps for many different resolution screens (4k, HD, etc), many screens at once, different form factors (kiosks, projectors, wall mounted, etc), and everything in between.

[Check out my portfolio for project examples and videos!](#)

MySQL, SQLite, PostgreSQL, MongoDB, PgAdmin, MariaDB ★★★★★

REST APIs & Networking ★★★★★

AWS (S3, RDS, App Runner, EC2) & Cloudflare ★★★★★

Javascript, HTML, CSS, Directus for CMS ★★★★★

Java, JavaFX, WPF, C, Python, Haskell & functional programming ★★★★★

Laravel, Vue, Ruby on Rails, Node.js, Grav, PHP ★★★★★

REFERRALS

Kyle Fitzpatrick

Ex Director of Software
